

Equaliser disc ProSilent quarter-segmentable for terrace support systems

Function:

The ProSilent equaliser disc, made of extra-soft, long-term stabilised PVC, reduces impact sound and all other movement noises. The 1 mm-thick disc can be divided into quarters and is therefore ideal for fine height compensation at different heights on one terrace support system.

Material:

PVC

Variants:

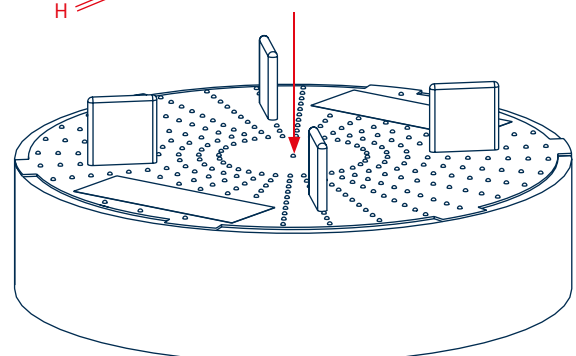

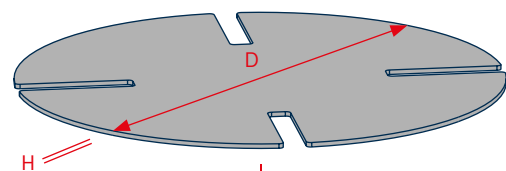

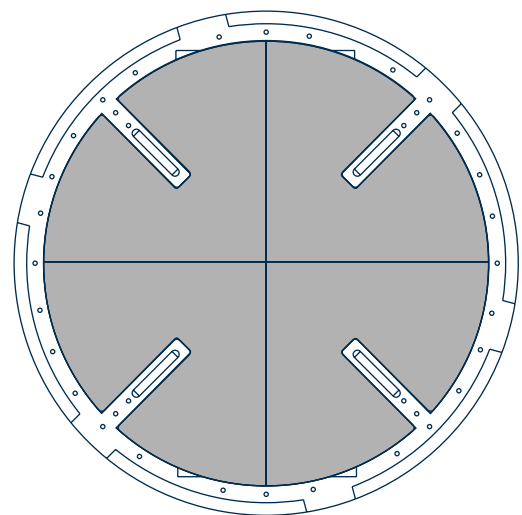

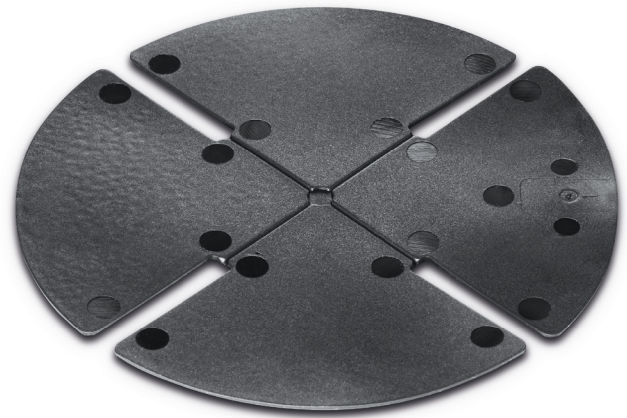

Colour Black

Packaging units:

Delivery in box / polybag, PU 50 pieces

Accessories:

- Low-profile terrace support system assembly
- Terrace support system H1
- Terrace support system H2
