

## “Dachigel” bird deterrent, transparent

### Function:

Bird deterrent, especially pigeon deterrent. The spiked elements hinder birds searching for resting and nesting places, thus reducing nuisance and bird droppings on buildings. The rounded tips on the spiked elements make sure the birds are not harmed. The transparent material meets the highest aesthetic requirements without the need for major outlay.

### Connection type:

The bird deterrent is either glued (e.g. with silicone) or screwed on, depending on the substrate.

### Material:

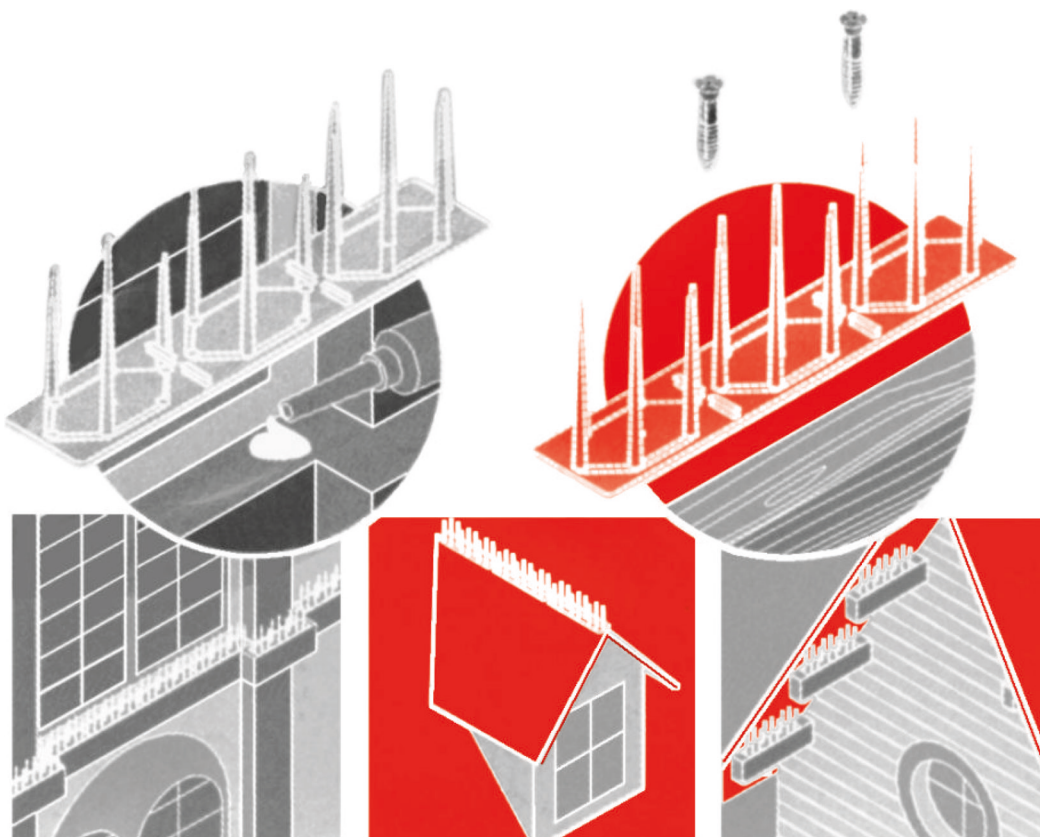

- Polycarbonate Transparent

### Dimensions:

- Length 250 mm
- Width 50 mm
- Height 85 mm

### Packaging units:

Delivery in box, PU 50 pieces  
(equivalent to 12.5 linear metres)
