

Gravel guard frame

Function:

The gravel guard frame reliably retains coarse dirt for gravel and other loads, preventing it from accumulating at the drain. Even with significant dirt accumulation, the gravel guard frame ensures the functionality of the drain.

Installation:

The gravel guard frame is placed centrally on the drainage point above the drain. The drain grate is then inserted into the opening and clamped into place. The gravel is then pushed against the gravel guard frame on all sides to fix it in position.

Material:

PVC Light grey, low-temperature impact resistant plastic, weatherproof

Delivery unit:

Gravel guard frame in welded design, ready to install, without drainage grating

Versions:

Universal size; different dimensions available on request

Package units:

Supplied in cartons, PU 1 unit
