

H-MAX terrace support system

Function:

Terrace support for the installation of all surface types, particularly stone slabs and boardwalk finishes. The height adjustment and optional equalizing elements permit easy levelling of surfaces and slopes. Additional protective mats must be fitted in areas frequented by the public, such as entrances to public buildings, cafeterias, etc.

Versions:

- 3 mm wide joints
- With snap-off wings

Package units:

Supplied in cartons, PU 25 units

Accessories:

- ProSilent equaliser disc for terrace support systems, splits into quarters, D 112 mm
- Pipe extension 60 mm
- Pipe extension 145 mm
