

Internal and external corners for roof membranes

Function:

Moulded part for connections and terminations in corner formations, can be used on both sides (see illustration)

Versions:

PVC Light grey, FPO/PP in White, Grey, Beige grey, Anthracite grey for connection to the matching roofing membrane material type. The materials are modified to be weather-resistant; UV-stabilised, against heat degradation and oxidative ageing as well as resistant to cold impact.

Connection type:

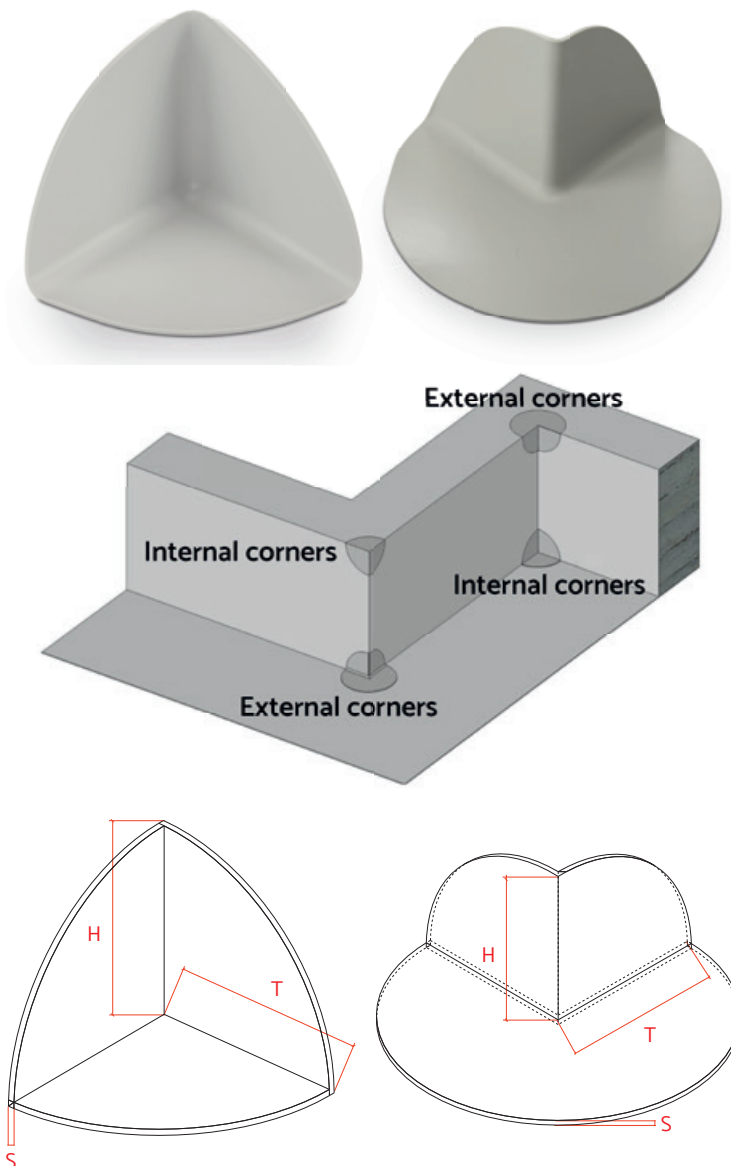

Welding, for direct connection to the roof membrane

Material:

- PVC Light grey
- FPO/PP White, Beige grey, Grey, Anthracite grey

Package units:

Supplied in cartons, PU 25 units
